Aged Care Quality and Safety Commission

alis

A close-up photograph of a woman, likely a healthcare worker, wearing blue scrubs and a stethoscope. She is looking slightly to the side with a gentle expression. The background is softly blurred, showing another person's profile.

Antimicrobial stewardship (AMS) and quality improvement

Free online program for aged care leaders

**A practical program to support safe and appropriate
antimicrobial use in residential or home/community
aged care settings**

Who is this program for?

This practical program is designed for leaders and champions working on AMS education, training and quality improvement in aged care. This may include:

- infection prevention and control (IPC) leads
- nurses
- care managers
- quality and safety managers
- pharmacists working with aged care providers.

FREE for registered providers, associated providers, their workers and responsible persons.

What will you learn?

You'll build your confidence and skills to:

- recognise the link between antimicrobial misuse/overuse and antimicrobial resistance

- set up and support an AMS system in your service
- identify areas where AMS can be improved
- develop and implement quality improvement initiatives to improve antimicrobial use
- prepare for the strengthened Quality Standards.

Program features

- 100% online
- Self-paced
- Realistic aged care scenarios
- Downloadable tools and templates

Enrol now

Available on the Commission's Aged Care Learning Information System (Alis).
